# Application Based Solutions

## URETHANE CONCRETE MORTAR

Designed for the food & beverage industry, urethane mortar provides superior performance under abrasive chemicals & thermal cycling to provide extended life-cycles.

**Areas to consider** - production facilities, wet environments, process & manufacturing, storage

## SAFETY COATINGS

Food grade safety coatings are available to communicate traffic patterns or OSHA 5-S safety protocols. Safety coatings provide resistance to chemicals and wet environments.

**Areas to consider** - production facilities, aisleways, warehouses, bottling lines, distribution

## FLOOR & WALL SYSTEMS

Anti-microbial floor & wall systems provide superior protection against bacterial and microbial growth. These systems provide a hygienic barrier by penetrating into the concrete substrate.

**Areas to consider** - production areas, kettle rooms, fermentation tanks, food service

## FLOOR REPAIR & DRAIN DETAIL

Quick-curing products and our expertise with drain details allows for quick service and repair to potentially hazardous areas. Your facility can be back to service in the same day.

**Areas to consider** - production lines, food service areas, bottling lines, kettle rooms

## TANK & SECONDARY CONTAINMENT SYSTEMS

Corrosion resistant coatings protect concrete and steel containments, silos and storage tanks and the materials held inside. These systems offer low life-cycle costs to protect your investments.

**Areas to consider** - process and manufacturing, eco-dip tanks, chemical storage, fuel storage
